## Barclays Natural Resource Investments Provides Resources To American Wind Capital

in News Departments > FYI  
by NAW Staff on Thursday 10 September 2009  
 

Essex, Conn.-based American Wind Capital Co. has announced that the Barclays Natural Resource Investments (BNRI) team of Barclays Capital and NGP Energy Technology Partners have made a significant investment in American Wind Capital.

American Wind Capital offers landowners that host wind or other renewable energy projects up-front cash payments, allowing them to monetize their future rent payments.

"NGP Energy Technology Partners focuses on investing in companies led by experienced management teams with a proven track record," says Philip Deutch, managing partner of NGP Energy Technology Partners. "American Wind has just such a team and is well positioned to benefit from, as well as promote, the continued growth of wind power."
